FUSION

METAL BASE SYSTEM

Fusion creates versatility

Fusion brings contemporary transformation to a traditional design with strength and stability. The Fusion metal line creates endless possibilities when it comes to personalizing a space. These products complement and work well with many of our other lines. Whether you are creating an open plan for collaborative work or a private office, Fusion makes it easy to continue to transform your space as your needs and workflow evolve.

Customize Cost-effectively

Fusion offers a sleek steel frame in three colors. This product's modern aesthetic melds well with the Kai Collection and iRize. It is highly integrative at a fraction of the cost. Although we recommend using Fusion with our products, it could be paired with many other lines to create that perfect design you need to achieve.
