Fusion

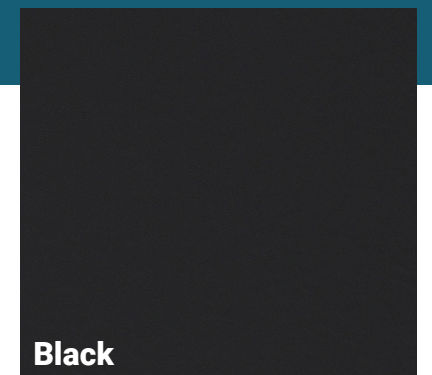

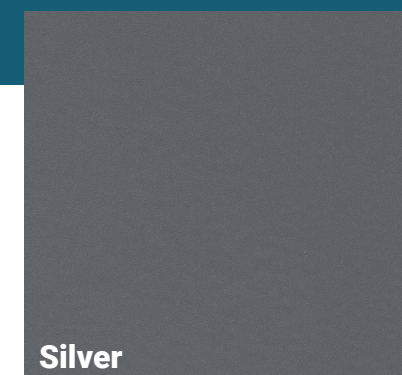

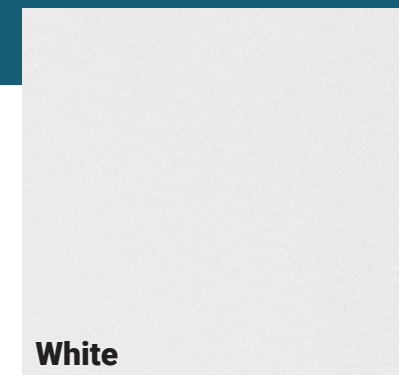

Where Durability Meets Design

Fusion brings contemporary transformation to traditional workspace design. Built with steel bases for strength, stability, and flexibility. As a metal-based system, it opens the door to personalized environments that evolve with your workflow. Transform your space by integrating laminate and height adjustable products as your needs and workflow evolve.

Metal Base System

Fusion powder coated metal bases are made of steel and available in Silver, Black, and White which add a modern aesthetic to any office space.

Features

Fusion's powder-coated frame is smooth, durable, and built for performance. 1" thick steel legs support up to 330 lbs, enabling rectangular or L-shaped configurations to interlock like a puzzle. Fusion is engineered for modern, open-plan environments.

This system extends beyond desking. Round table bases in 28" standard height or 40" café height support tops up to 42" in round or square formats. Pair the Fusion base with any commercial worksurface to inject a streamlined, modern aesthetic into workspaces, lounges, or training zones.

Industrial Durability. Modern Flexibility.

Fusion brings durable design to every workspace. It combines with our laminate casegoods collections, Rayne and Kai, and our iRize height adjustable bases to bring innovative design to your workspace.

Rayne + Fusion

Pair Rayne laminate casegoods with Fusion metal bases for a balanced mix of coastal character and modern industrial structure. Configure your workspace your way with a broad range of casegoods that flex to your workspace.

iRize + Fusion

Need a lift? iRize and Fusion pair seamlessly together. Pictured in Samoa Gray, the bases of iRize and Fusion are available in matching laminate and base finishes with the same powder coat. Add storage to complete the look.

Kai + Fusion

Blending Kai laminate casegoods with Fusion delivers a sleek, modern industrial design aesthetic. Combine Kai, Fusion, and iRize to achieve a refined, structural look with a sleek, unified profile.
